Learnings from the INOS Project

Integrating Open and Citizen Science into Higher Education Learning Approaches

Rosie Allison LIBER Europe

The INOS Project

"Integrating Open and Citizen Science into Active Learning Approaches in Higher Education", 2019-2022

We aim to:

- MODERNISE Higher Education curricula
- UPSKILL Higher Education academic and library staff, and students

Pedagogical grounding

inos-project.eu

Evidence-based overview of trends in OS (and CS) public activities and HEIs role 4

Encourage collaboration and multidisciplinary approaches between students and HE staff

2

1

Solidify OS (and CS) practice through solid pedagogical grounding from well-tested active learning approaches

5

Upskill HE staff (academic and library) and students

3

Encourage collaboration between citizens, HE staff and students in knowledge creation activities

6

Trigger policy change by raising awareness on societal impact from OS (and CS) inside and outside HEIs

Analysing common features across Open Science projects

Results of a landscape analysis of 20 OS projects

Academia permeating society through Citizen Science Use cases of engagement in Higher Education

1. Epidemium

- 2. Aalborg University's Megaprojects
- **3. Collecting litter and data to combat plastic pollution in Denmark**
- 4. Tallinn University LIFE projects
- 5. Ocean i3
- 6. Project Discovery: Citizen science with Eve Online
- 7. Citizen science activities organised by Tartu University Natural Science Museum
- 8. **#DataOnTheStreets Rally and the Better Budget Dataquest**
- 9. iScape Living Labs
- **10. Mosquito Alert**
- 11. NASA's GLOBE Observer
- 12. Smartfin
- 13. Europeana Transcribathon
- 14. Flint Water Study
- 15. Open Seventeen
- 16. Open source electric vehicle
- 17. DigiEduHack
- **18. Climathon**
- **19. AirCitizen**
- 20. Citizen science in Helsinki's Central Park

WAYS TO INTEGRATE OPEN & CITIZEN SCIENCE INTO ACTIVE LEARNING APPROACHES IN HIGHER EDUCATION

The INOS Project

Open Science & Citizen Science are key catalysts in shaping research and society in the European Union and the world.

The INOS Project aims to modernize Higher Education Institutions' curricula through civic engagement in Open & Citizen Science.

and-CS-with-active-learning-approaches-in-HE.png

Engage with university students to meet ambitious social objectives.

Whereas university staff may be involved in Open & Citizen Science projects, university students are much less involved.

Develop curricula that embrace Citizen Science, Open Science & public participation in shaping science.

Include Open & Citizen Science in higher education curricula as a means to mainstream it in university learning & teaching practice.

Support local communities seeking scientific advice.

Collaboration between scientists & citizens is of crtical importance in addressing complex issues, such as environmental justice & public health advocacy.

Engage in Open Innovation.

5

9

https://inos-project.eu/wp-content/uploads/2022/11/9-ways-to-integrate-OS-

Universities & their libraries are expected to commit to new knowledge creation, thus becoming a key source of innovation in society.

Leverage the role of universities in financial transparency initiatives.

Social movements asking for more financial transparency on national & global levels should be supported by universities through Open & Citizen Science.

4

8

Adopt innovative approaches in academic engagement for civil society.

Academic & library staff should go beyond mainstream solutions to reach out to new, ground-breaking initiatives.

Involve academic & library staff in the design and implementation of Citizen & Open Science.

3

Adopt more diversified roles at various stages of Open and Citizen Science projects, beyond the 'observer' role of scientific validation or external evaluation.

Extend Open and Citizen Science projects to many stakeholders.

Broad collaboration is needed to tackle social issues.

Build trust & sustainability by including citizens.

Learn more at

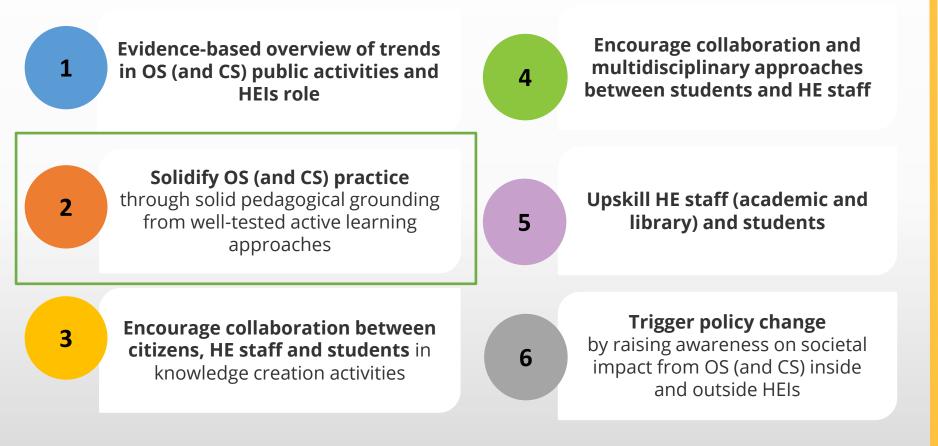

inos-project.e

7

Higher Education Institutions & academic libraries should look beyond the end of an Open/Citizen Science project: take sustainability measures, strengthen community uptake & build trust with volunteers.

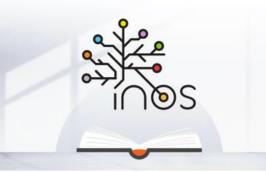

A learning design approach (to shape OS at HEIs and beyond)

Analysis of case studies

INTEGRATING OPEN AND CITIZEN SCIENCE INTO ACTIVE LEARNING APPROACHES IN HIGHER EDUCATION

State-of-the-art analysis of the pedagogical underpinnings of open science, citizen science and open innovation activities

Co-creating a shared vision with key stakeholders

Cultural and Policy Change for an Open Future

'cultural change requires more than a series of actions. Change can only take place where there is trust, collaboration and commitment to a shared vision for the future.'

LERU advice paper, Open Science and its role in universities: A roadmap for cultural change (2018)

https://www.leru.org/publications/open-science-and-itsrole-in-universities-a-roadmap-for-cultural-change

#1 Utilise the role of (academic) libraries

#2 Reform the traditional structure of the HEI

#3 Reform of recognition and rewards systems #4 Advocate, communicate and collaborate

MSc Citizen Science

Citizen Science Lab

About the team

The Citizen Science Lab brings together researchers, citizens and societal organizations to create new knowledge for science and society.

https://www.universiteitleid en.nl/en/citizensciencelab

TRIPLE: Team Spirit as the default approach to working in academia

TRIPLE MODEL

#3 Reform of recognition and rewards systems

The TRIPLE system 'rewards teamwork by support staff and all others involved, and it will evaluate quality, real impact on academia and society, sharing, and openness to the world'

https://www.uu.nl/sites/default/files/UU-Recognitionand-Rewards-Vision.pdf

'Scholarship is a complex system. Open Science is even more complex. The transition to Open Science affects all stakeholders – universities, researchers, teachers, students, funders, publishers, policymakers and support organisations'

#4 Advocate, communicate and collaborate
